The Week Ahead

As we enter week 8 of summer camp (my how time flies!), we get to visit Europe. Europe is such a diverse and interesting place, and we wish we had more than a week to explore and learn about all of its wonderful countries!

Learning how to code with our bug bots!

This week is going to be especially exciting. Monday, the students will adventure into Ireland, and get to visit the Aran Island, Killarney National Park, and Carlingford. On Tuesday it's time to head on over to Italy. Here, we get to visit Venice and travel by taxi-boats called gondolas, and also learn about the tower of Pisa! Wednesday it's time to strut over to France where we can learn about fashion & fashion shows! We can also visit the Eiffel tower some popular museums. Thursday the class is off to Belgium, where we will make paper dolls, make chocolate scented playdough, and visit the Battlefield of Waterloo. We will finish off this week in Germany. Here we get to learn about different German foods and learn words like “hi” and “bye”, as well as visit the Black Forest Museum. This should be a great week!
