

## Summer Week 5

Where did we go:  
Antarctica

---

**Fun Fact: Antarctica is considered a desert because it only receives about 30-50 centimeters of rain a year.**

---

### REMINDERS:

- ❖ Kona Ice Friday  
July 9<sup>th</sup>

Please send your child's money in a small bag labeled with their name.

# KG Prep

## Weekly Review

This week in KG Prep we bundled up and traveled all the way to Antarctica. Students were able to learn about the scientific research done there, what animals are found there and the unique ecosystem of Antarctica. Students participated in many activities such as making their own snow, designing their own ice skates and an experiment that taught them about how animals use their blubber to stay warm in the cold temperatures.

In STEM this week students got to use glue and shaving cream as a holding component to use to try and design their own structures using geometrical shapes. Students also got to be involved in driving the robot using an iPad.
