

# Summer Week 6

7/5/21-7/9/21

## Where did we go?

### Africa

- Egypt
- Kenya
- Madagascar
- Uganda
- Congo

## REMINDERS:

- ❖ **Splash Day**  
Friday July  
16<sup>th</sup>
- ❖ **Nut free**  
**Facility**

\*

# KG Prep

## Weekly Review

This week in KG Prep we travelled to Africa. Our first stop was to Egypt to look at the pyramids and practice our wrapping skills with a mummy race. We went to Kenya and learned about their tribal history and designed some custom necklaces. We then traveled to Madagascar and explored their lush ecosystem and animal population. Next, we went to Uganda and put our balancing skills to the test by trying to balance baskets on our heads. Our last stop was Congo, who has the second largest rainforest. We looked at how dark it gets at the bottom of the rainforest and found a few out of 10,000 animals that make Congo their home. The students worked in teams to create homes for animals out of recycled materials. This week we also painted using watercolor, had tech time with OSMO and worked together to get PandaBot through his town safely. (Pictured below)

**In STEM this week students got to take turns learning to fly the drone outside. They had fun trying to make it go different directions, fly under and over obstacles and trying not to get tangled in the net. This activity practices so many important skills like hand-eye coordination, following multi-step directions, taking turns, small motor development and some great cognitive skills!**
